PROFESSIONAL SUMMARY

Result-driven Senior Database Engineer and Cloud Architect with over 13 years of experience designing, automating, and optimizing high-availability enterprise data environments. Deep specialization in Oracle Exadata administration, large-scale data migrations, and multi-cloud infrastructure strategy (AWS, OCI, Azure). Proven track record of eliminating data pipeline bottlenecks, automating infrastructure monitoring, and maintaining 99.99% uptime for mission-critical banking and government systems.

CORE SKILLS

Databases: Oracle, SQL Server, PostgreSQL

Engineered Systems: Exadata (X2 through X9M), Patching, Upgrades, Capacity Planning

Core Database Skills: RAC, ASM, RMAN, Golden Gate, Data Guard, Exadata patching

Cloud: AWS, OCI, Azure

Tools/Platforms: Oracle Cloud Control, Oracle ODI, OFSAA, Databricks

Automation: Python, Bash Scripting, Prometheus, Grafana

PROFESSIONAL EXPERIENCE

National Bank of Kuwait, Kuwait — Senior Database Administrator and Data Engineer

Oct 2020 – March 2026

- **Infrastructure Design:** Architected and deployed the core infrastructure for the Enterprise Data Warehouse (EDW) utilizing Oracle Exadata X8M and X9M platforms.
- **Performance Optimization:** Streamlined complex data pipelines and optimized SQL execution, resulting in a 40% increase in processing throughput and a significant reduction in batch latencies.
- **High Availability & DR:** Designed, tested, and maintained robust disaster recovery and high-availability architectures using Oracle RAC and Data Guard across production environments.
- **Automation & Observability:** Developed custom Python and Bash scripts to automate routine database monitoring, backup validations, and diagnostics; built real-time visual dashboards using Prometheus and Grafana.
- **Lifecycle Management:** Orchestrated end-to-end patch planning, testing, and execution for complex database environments across production, development, and testing zones.

Realsoft, Jordan — Senior DBA and Data Engineer

Jun 2016 – Sep 2020

- **Large-Scale Migration:** Directed the successful migration of a 53 TB enterprise data warehouse from Exadata V2 to X4 hardware, maintaining strict data integrity and achieving near-zero business downtime.
- **Data Integration:** Engineered scalable ETL pipelines using Sqoop to consolidate massive datasets from 6 distinct government agencies into a centralized Hive data warehouse.
- **Data Modeling:** Designed robust data models and integration workflows supporting large-scale national statistical surveys and analytics systems.

Al-Khaleej for Computers, Saudi Arabia — Senior DBA

Apr 2013 – Jun 2016

- **Platform Migration:** Successfully migrated 8 core corporate databases from legacy HP-UX and Linux environments over to Oracle Exadata platforms.
- **Cluster Deployment:** Configured, tested, and deployed multiple production Oracle RAC environments to ensure enterprise-level fault tolerance.
- **SQL Server Clustering:** Constructed a centralized SQL Server failover cluster environment and successfully consolidated multiple standalone SQL instances.

Globitel, Jordan — Senior Database and Software Developer

Nov 2008 – Apr 2013

- **Web Application Development:** Functioned as a software developer to design, build, and maintain robust administrative websites used to manage core enterprise applications. Developed responsive front-end components and secure back-end logic using Java, ASP.NET, HTML, and jQuery.
- **Database Support:** Provided tier-3 technical support, structural troubleshooting, and performance tuning for high-volume Oracle and MS SQL Server database systems.
- **Process Automation:** Built automated maintenance routines to clean, partition, and maintain high-velocity telecom data repositories.

SELECTED PROJECTS

Enterprise Data Warehouse (NBK) – large-scale data warehouses project at National Bank of Kuwait

VIVA Kuwait Exadata Migration - Migrated 53 TB warehouse from Exadata V2 to X4-2 with minimal downtime

Tabadul - Designed and implemented data integration processes for a Register-Based Statistics Project across six government agencies

Roam Analyze (Globitel) – Build website and dashboards for monitoring for inbound/outbound telecom roaming

GGDATA (Globitel) – Database repository for GSM data

Al-Khwarizmi (Realsoft) - Migrated Al-Khwarizmi Microsoft SQL Server database objects and schemas to Oracle database environments

Ministry of Education (Realsoft) – Relocate Exadata machine and patch Exadata image to latest

Miyahuna (Realsoft) – Build Data model and data integration for water meter surveys in Jordan

EDUCATION

Bachelor of Management Information System

Al-Balqa Applied University, Amman, Jordan

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Oracle Exadata Expert (OCE) | Oracle Database Certified Professional (OCP)
- Databricks Certified Associate Developer for Apache Spark
- Databricks Academy - Generative AI Fundamentals
- PostgreSQL Essentials v16 Certification
- Microsoft Certified: Azure Data Fundamentals
- Confluent Certified Data Streaming Engineer
